Education Division

The Bachelor of Education programs are specifically designed for the UAE’s teaching needs. Prepared with up-to-date knowledge of educational theory, HCT education students practice the skills they have learned at their college in actual classroom situations throughout the programs. This hands-on approach to learning gives students the teaching skills they need to excel in their future careers.

Graduates of the HCT Education Division will contribute effectively to the quality of teaching and learning in UAE schools, early learning centers and other educational settings through: The use of interactive, authentic, constructivist, and integrated approaches to teaching, learning and assessment. A deep theoretical understanding of learning processes. The development of excellent practical teaching skills through extensive experiences in classrooms, supported by effective mentors, and a commitment to continuous improvement through reflective practice. The development of the skills, knowledge and aptitude to contribute to future changes and improvements to curriculum and educational practice in the UAE.
