Health Sciences Division

Health Care services are growing in both the UAE and Fujairah. Our Bachelor programs provide graduates with the skills they need to succeed in this challenging and rewarding field.

Students learn in classrooms, laboratories, clinics and hospitals where training covers the knowledge, skills, attitudes, and behaviors expected of a modern health sciences professional. The HCT Health Sciences programs meet the highest academic and industry standards so graduates are in demand by employers.

Health Sciences graduates can expect to work in hospitals, government, laboratories, education and a large range of private and semi-private health-related organizations.

Possible majors at HCT-Fujairah for Fall 2012 include:

- **Bachelor of Health Care Administration and Leadership**
  Health care managers need to have the administrative skills that would allow them to assume leadership roles in increasingly complex health care delivery systems. Students will learn to take on leadership roles in planning, directing, coordinating and delivering health care services.

- **Bachelor of Science in Medical Imaging**
  Graduates are professional radiographers who specialized in medical images and quality patient care. Radiographers work independently and with a team, including physicians to create images in computed tomography (CT), Magnetic resonance (MR), mammography, cardiovascular interventional technology (CIT) and x-ray images. Graduates are recognized by the Society of Radiographer’s of the UK.
